## HOW TO DRAW A HISTOGRAM

Steps for constructing a frequency distribution bar graph are as follows:

1. Count number of data points[ n$]$ from data sheet.
2. Compute the range of data[R].
3. Determine the number of classes/interval or class size[K].
4. Compute class/interval width[ H$]$ using formula $[\mathrm{H}=\mathrm{R} / \mathrm{K}]$
5. Determine the starting points of intervals.
6. Prepare Tally/Check sheet by summarize data on it.
7. Count number of parts in each intervals i.e. Number of frequencies within a particular class.
8. Now plot the graph. Place frequencies on vertical axis, and class intervals on horizontal axis.
9. Interpret the histogram by seeing the shape distribution.

## Data sheet

Shaft dia measurements against Specification: 9.0 +0.2

| 9.13 | 9.1 | 9.16 | 9.05 | 9.15 | 9.13 | 9.08 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 9.15 | 9.07 | 9.09 | 9.1 | 9.12 | 9.06 | 9.11 |
| 9.07 | 9.15 | 9.12 | 9.12 | 9.17 | 9.08 | 9.15 |
| 9.09 | 9.11 | 9.15 | 9.17 | 9.12 | 9.11 | 9.17 |
| 9.12 | 9.08 | 9.17 | 9.13 | 9.08 | 9.09 | 9.14 |

Number of measurements or data points ' $n$ ' $=35$
Range ' $R$ ' = [Max. value - Min. value]

$$
=9.17-9.05=0.12
$$

## Table-1, for selection of Class size ' $K$ '

| No. of Data | No. of Classes 'K' |
| :---: | :---: |
| Under 50 | $5-7$ |
| $50-100$ | $6-10$ |
| $100-250$ | $7-15$ |
| Over 250 |  |
| As the data points ' $n$ ' are 35, which falls under 50, therefore, we <br> can select here classes ' $K$ ' $=5$ |  |

https://techqualitypedia.com/histogram/

## Determine the Class width ' H '

Here we want to make number of classes ' $K$ ' $=5$
Now, calculate the class width by dividing the Range-R, by number of classes-K

$$
\begin{gathered}
H=R / K \\
H=0.12 / 5 \\
H=0.024
\end{gathered}
$$

Note: Select ' H ' such that ' $K$ ' should lie in between above class table-1.

## Tally/Check Sheet

| Class <br> No. | Class Intervals | Frequency tally | Frequency |
| :---: | :---: | :---: | :---: |
| 1 | 9.05-9.07 | \|||| | 4 |
| 2 | 9.08-9.10 | HH \||III | 9 |
| 3 | 9.11-9.13 | HH HHI | 11 |
| 4 | 9.14-9.16 | HH II | 7 |
| 5 | 9.17-9.19 | \|||| | 4 |

https://techqualitypedia.com/histogram/

| Tally/Check Sheet |  |  |  |
| :---: | :---: | :--- | :---: |
| Class <br> No. | Class Intervals | Frequency tally | Frequency |
| 1 | $9.05-9.07$ | IIII | 4 |
| 2 | $9.08-9.10$ | HY IIII | $\mathbf{9}$ |
| 3 | $9.11-9.13$ | HY IH I | $\mathbf{1 1}$ |
| 4 | $9.14-9.16$ | HY II | $\mathbf{7}$ |
| 5 | $9.17-9.19$ | IIII | $\mathbf{4}$ |
